

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Measure the following in **centimeters**:

My hand span is \_\_\_\_\_ cm. (measure outstretched hand between tip of thumb and tip of little finger)

The width of my index fingernail is \_\_\_\_\_ cm.

The width of the back my hand is \_\_\_\_\_ cm.

My foot is \_\_\_\_\_ cm

Using the measurements you have from above, **estimate** the following lengths **FIRST**., then check for accuracy:

<b>Object</b>	<b>Estimation in cm</b>	<b>Actual Length in cm</b>
Length of lab table		
Width of this piece of paper		
My pencil		
My chair
